

Bi2 PRESS RELEASE

Luminous launches 'Bi2 SINE WAVE Inverter' - India's first Inverter with 7-year battery life

Luminous Power Technologies have introduced Luminous Bi2 SINE WAVE Inverter in the market, which is India's first inverter with 7-year battery life and can be considered as the best inverter launched in India so far. It comes with features like: Advanced dual processor, Preloaded battery management software, Battery charging even at 120V mains. This is coupled with three-year warranty on the inverter as well as battery, which makes it the best offering in the market.

Bi2 Sine Wave Inverter comes with features like a hi-tech micro controller-based design, REC technology for high energy efficiency and comes with the widest charging window that ensures battery charging even at input voltage as low as 120V and as high as 300V.

Besides these advanced technological features, it has super-fast charging. It also possess a 'Self Diagnostic' feature that automatically checks the health of different control & display functions at the time of battery connection and comes with a state-of-the-art digital display, permitting ease of use. Another USP of the Bi2 is its very attractive design and elegant looks.

According to Mr. Rakesh Malhotra, M.D., Luminous power technologies, " Bi2 Sine Wave inverter is another milestone in our endeavor to provide customers with a perfect choice of power protection at competitive prices. This product offers high performance, great value for money and also prevents users from exposure to pollution caused by using normal inverters, making it very safe for use in closed environments."

Luminous is the number one selling inverter brand in the country, with over millions of satisfied users worldwide. Apart from excellent technological product features and top quality manufacturing, what makes Luminous the preferred choice among inverter users in the country is an industry-leading fully automated 'After Sales Support' system. It offers top-of-the-line service support, which is further supported with a call-center facility that can register customer complaints 24/7.
